

XM Satellite Radio has been the saviour of music for me. The programming, the variety, the concept, the choices!!!! That is key to ALL who PAY for this service. We choose to pay for XM. We know we have the option of local radio, but obviously it does not give us what we want, so much that we're willing to pay for what radio is all about. The content. For the NAB to limit XM's broadcasting of local traffic and weather is ridiculous. XM has just as much right to its broadcast content as any "local" station.

Next thing you know the guys at Wendy's will tell McDonald's that they can't sell hamburgers because Wendy's was there first.

I strongly urge the FCC to reject NAB's petition 04-160.
